

Launch of Mini-PC complete systems with Windows 7 pre-installed

Date: 10-23-2009 09:26 AM CET

Category: [IT, New Media & Software](#)

Press release from: [Shuttle Computer Handels GmbH](#)

All-in-One PCs and nettops benefit from low system requirements / out-of-the-box compatibility for barebones

Shuttle Inc., market leader in the Mini-PC sector and manufacturer of Multi-Form-Factor solutions, is now supplying complete systems in Europe optionally with Microsoft Windows 7. Buyers benefit from customised setups for individual models without the unnecessary burden of third-party programs.

With new functions, improved resource management and an attractive new look, the success of this new operating system seems assured. Windows 7 offers an array of options previously only possible with the installation of third-party programs. For instance, it is now possible to burn ISO files and Blu-ray discs for the first time. The new Jump Lists, Aero Shake, Peek and Snap features are practical enhancements for everyday tasks. Windows 7 makes smarter use of RAM, only starts up services when they are actually needed and works significantly faster with SSDs than its predecessors. The Windows Media Center has been made more user-friendly, Wordpad and Paint have a completely new look and the Problem Step Recorder makes troubleshooting easier should any problems occur.

"Shuttle has been successfully manufacturing complete systems based on its Mini-PC-Barebones since 2004. All systems are developed and produced in Germany", states Tom Seiffert, Head of Marketing & PR at Shuttle Computer Handels GmbH. "We chose the All-in-One-PC X50 as the first model to be provided with Windows 7 since the operating speed and new interface are of particular benefit with this system."

Turnkey Mini-PC complete systems with Windows 7 and 24-month pick-up-and-return service are available now from specialist retailers or via the Shuttle Systems Configurator.

A recently launched microsite about Windows 7 gives information on all the most important features:
www.shuttle.eu/Windows7

Shuttle Inc, founded in Taiwan in 1983, is specialised in development and production of innovative mini PCs. The joint-stock company is represented worldwide by a network of branch offices in Germany, the US and Japan. Since 2001 the attractive cube-shaped PCs have conquered nearly any field of application and have become the core business of the company headquartered in Taipei / Taiwan. Widely acclaimed by customers and press across the globe, Shuttle founds its success on effective management and long-term experience in making mainboards of highest quality standards. Since years Shuttle's mini PC barebones and fully-configured systems are the first choice of many system integrators, VARs, OEMs and ODMs banking on the high reliability and build quality. With appealing mini PC solutions Shuttle meets the requirements of consumers excellently and seeks to provide further user-friendly solutions of consumer electronics for the digital home environment.
