Press release from: [Enhance Technology, Inc.](#)

Santa Fe Springs, Calif. (November 25, 2009) – Enhance Technology, Inc. is proud to release the EnhanceRAID TS800 Series, a high performing desktop RAID storage system with RAID-6 and Web GUI Management. The EnhanceRAID TS800 Series consist of four models, each with its own alternative connectivity interfaces: IP (iSCSI), SC (SCSI), SS (SAS), and FC (Fibre Channel).

Powered by the newly 80-plus efficient green power supply, the TS800 comes with an integrated hardware RAID controller and light pipes for the drive trays to display current HDD activity instead of conventional LEDs. The TS800 Series supports eight (8x) removable drive bays that are styled with a silver color T-shape design and individual lock and key for maximum data protection & secured storage for mission critical computations and application servers.

Significant features of the TS800 are as follows:

- Disk Supported Serial ATA I&II at 3.0 Gbp/s
- Individual Key and Lock for Each Drive Tray
- RAID levels supported 0, 1, 0+1, 3, 5, 6, 50, 60 & JBOD
- Support Easy & Powerful Web GUI Management
- Standard 300Watts 80+ Green Power Supply
- Optional: Redundant 2 X 320 Watts PSU

The TS800 is accustomed for applications that require exceptionally high performance along with massive amounts of storage capacity such as HD security surveillance, server applications, post production, professional contents creation, & digital media library. Providing up to 600MB/sec (TS800 SS), the TS800 Series is extremely suitable for SMB (small or medium business) and is ideal for the corporate video production environment.

Customers also have the option to purchase the TS800 as a fully populated model – when each tray is embedded with a 1.5TB hard drive. The TS800-F12T is a “turn-key” solution, in which the entire unit is fully tested, RAID configured, and certified by our professional engineers. Included would be the complimentary EnhanceCARE SSP™ service and support package – a protection coverage that allows consumers to be confident in their purchasing decision. EnhanceCARE SSP™ comes with an industry leading three (3x) years manufacturer warranty with 30 days money back guaranteed and extended after-hour support. Also covered by the EnhanceCARE SSP™ are 1-year Advanced Replacement Program & RMA loaner unit that Enhance will replace a defected part for up to one year so that there are no disruption to consumers’ daily operation.

With the service and quality that Enhance Technology is dedicated to provide its customers, the TS800 Series is one of the most advanced and versatile desktop RAID storage systems available today. With Enhance Technology’s TS800 storage solution, customers would get a very cost-effective system for any SOHO, SMBs & Production Facilities without sacrificing the performance.

About Enhance Technology:

Founded in 1997, Enhance Technology designs and manufactures high performance storage systems and products for the digital content creation, medical imaging, security surveillance, data archive applications, and IT market spaces. Headquartered in Santa Fe Springs, California with Asia branch in Taipei Taiwan, Enhance Technology has become a world leader in hybrid I/O storage design and development.
