

PANDUIT™ show PANVIEW and DPoE solutions at Easyfairs in Sweden

Date: 08-30-2006 06:50 PM CET

Category: [Media & Telecommunications](#)

Press release from: [Panduit Europe Ltd.](#)

September, 2006. London, UK.

PANDUIT is showing its network solutions at the Easyfair events in Stockholm and Gothenburg, Sweden in September.

The PANDUIT DPoE™ solution is an economical way to deploy network devices. It allows easy installation and relocation of PoE enabled devices and increases the longevity of UPSs by prioritising power supply to mission critical areas. The PANDUIT DPoE™ solution includes power patch panels, power supply and power systems.

The PANVIEW™ physical layer management solution provides a complete overview of your network. With features such as instant alert messages detailing patch cord moves and the function to plan, prioritise and assign MACs, PANVIEW™ allows you to manage the physical layer of your entire network from your work station.

Other solutions demonstrated on the PANDUIT stand will include the versatile PANTHER™ LS8 Hand-Held Thermal Transfer Printer; a printer for all labelling applications, and Easy-Mark™ labelling software which simplifies label creation for applications in markets such as Network, Panel Building and Construction & Maintenance.

Come and see these solutions at our stand:

13-14 September, 2006. Sollentuna Expo Centre, Stockholm. Stand B:43

27-28 September, 2006. Eriksbergshallen, Gothenburg. Stand 27
