Press release from: [euNetworks](#)

Frankfurt, Germany – euNetworks Group Limited (SGX: H23.SI), a provider of mission-critical, high-performance networking solutions in Europe, announced that CONET Services AG selected euNetworks' euConnect solution to offer ultra-low latency connectivity to customers between key sites. This partnership will ensure CONET customers can benefit from the availability of high quality, ultra-low latency Ethernet connectivity between CONET and other key Exchanges, Trading Houses and Datacentres.

euConnect combines high performance Ethernet, Internet and Quality of Service in a single solution, with bandwidth options between 100Mbps and 10Gbps, delivered over either 1GigE or 10GigE. This low latency network is capable of handling multiple application types such as Voice, Data, Web or Video, delivered in days rather than weeks.

The core competences of CONET Services AG are the datacentre provision for IT-solutions, especially the hosting of low-latency trading systems in proximity centres, as well as related consulting. The spread services provided by the new subsidiary of the CONET Group range from conception, to the installation as well as the operation of IT-systems and applications, which are designed especially for financial service providers with special requirements towards the stability and availability of IT-Systems. "We choose euNetworks based on their quick turnaround and flexibility to meet both our immediate and long-term business needs. What impressed us most was their ability to deliver against their promises" Franz Pepelnik, CEO of CONET Services AG.

"We pride ourselves on helping our customer's to succeed in business, being flexible to change and willing to provide solutions that scale in a cost efficient manner and add value" said Uwe Nickl, Chief Marketing Officer of euNetworks.

About euConnect

euConnect is a high performance Ethernet solution for linking buildings across and between European cities, which can be delivered within days, not weeks.

euConnect supports the full range of topologies including Point to Point (P2P), Point to Multipoint (P2MP) Multiple Point to Points (MP2P) and Any to Any (A2A).

euConnect is delivered as either 1GigE or 10GigE with bandwidth options between 100Mbps and 10Gbps, available in 15 Metro cities across Europe.

euConnect includes options for dedicated internet access and protection.

About euNetworks

Our €1bn all-optical network delivers a new level of freedom and performance. We exclusively offer high-performance networking and specialise in solutions for high performance businesses in the Finance and Media sectors, and Carriers / Service Provider markets. We own 15 metropolitan networks throughout Europe, connected with a fully owned, high-capacity backbone. Because we own the network, we deliver superior performance that we contractually guarantee. Our Carrier Grade services are massively scalable and delivered on-demand, in days not weeks.

euNetworks Group Limited is headquartered in London and publicly listed on the Singapore Stock Exchange (SGX: H23.SI). For further information please visit www.euNetworks.com.
