

New video demo of EMC Documentum eRoom to CenterStage migration with EntropySoft Content ETL

Date: 12-16-2009 10:24 AM CET

Category: [IT, New Media & Software](#)

Press release from: [EntropySoft](#)

EntropySoft, a specialist in the Enterprise Content Integration (ECI) market, recently made available a video demo of an EMC Documentum eRoom to CenterStage migration.

The video shows all the necessary stages that need to be completed to ensure a safe migration: how to connect both applications and build a migration bridge, the analysis of an eRoom facility, the automatic mapping of eRoom and CenterStage objects, debugging processes and monitoring them, then generating migration reports.

Thanks to Content ETL, all content can be safely transferred from one content repository to another while preserving security and all metadata. The content bridges and transfer processes can be automated, saving time and reducing potential errors.

EntropySoft's Content ETL can help you manage complex transfers between 35 content-centric applications such as SharePoint, LiveLink, Alfresco, TeamSite etc...

The videos showing in detail the transfer process can be seen on EntropySoft's website: bit.ly/4EGhSW

The release of this video demo follows the release of an EMC Documentum CenterStage connector. By making available a CenterStage connector, EntropySoft is increasing again its unrivalled interoperability capacities and the attractiveness of its product offer.

"This video fully illustrates our Content ETL in action. Comparable transfers can be achieved with any of the applications for which we have a connector" said Nicolas Maquaire, CEO and co-founder of EntropySoft. "Our Content ETL can be used to automate Records Management from various sources, for archiving purposes, content distribution or content transfers. It is the ideal product to manage all content integration operations."

EntropySoft is one of the world leaders for connectivity. It has more than 35 read/write enterprise connectors for unstructured data, possibly the biggest portfolio in the market. The extensive support of features and the size of the connector portfolio make this technology perfect OEM material for many software industries. The state-of-the-art connectors help customers focus on their differentiators, allowing them to concentrate on their core business while EntropySoft takes care of the connectivity.

All major Enterprise Content Management Systems are present in EntropySoft's portfolio: Alfresco, IBM FileNet P8,

OpenText LiveLink and eDOCS, Interwoven TeamSite, IBM Lotus Quickplace, Microsoft SharePoint etc... All connectors have been fully tested on large implementations in critical business projects.

EntropySoft brings Content Management Intelligence to its customers.

EntropySoft is focusing on the integration of unstructured data and is a pure-player in the ECI global market (Enterprise Content Integration). An information-access expert, EntropySoft's mission is to facilitate content access and make content interoperability easy.

EntropySoft technology is used by software vendors to simplify the integration between their solution and all content management solutions. Application fields are numerous (Enterprise Search, BPM, e-discovery, Records Management, Collaboration, etc...). EntropySoft has the most extensive read / write connector portfolio in the market.

EntropySoft also has a Content ETL (for cross-repository transfers and cloud synchronization) and a Content Federation Server (to simplify enterprise connectivity architecture).

The following leading global organizations integrate EntropySoft connectors: Attivio, Coveo, Digital Reef, Endeca, Exalead, IDS Scheer, Image Integration Systems, Jahia, Kazeon and W4.
