

One-Touch convertible top operation: SmartTOP for Audi A5 Convertible

Date: 12-29-2009 10:45 AM CET

Category: [Tourism, Cars, Traffic](#)

Press release from: [mods4cars](#)

With the introduction of their newest SmartTOP module, Mods4cars is proud to offer the world's first aftermarket convertible top controller for the new Audi A5.

Those who like to go topless and want to add extra convenience to their automated drop tops will find that the SmartTOP add-on modules offered by Mods4cars are a perfect fit. Engineered in Germany and made in the USA, the modules add a plethora of customizable options to an ever growing number of supported vehicles. The two most popular features, one-touch top operation while driving and the ability to remotely control the top from the factory key fob, have made the SmartTOP a must-have aftermarket upgrade for the last 10 years. Offering modules for Alfa, Audi, BMW, Ferrari, Ford, Mercedes Benz, Mini, Opel, Porsche, Volvo and VW, Mods4cars has a comprehensive selection for the discerning driver.

With the addition of the brand new multi-functional SmartTOP module for the Audi A5 convertible, a world's first, Mods4cars remains the industry leader in aftermarket convertible top technology and offers even more drivers the opportunity to upgrade their cars with a SmartTOP; a convenience that once experienced, is hard to live without.

Audi A5 drivers can find a demonstration of the new SmartTOP here:

About mods4cars:

Mods4cars was founded in 2002 with the idea to add a highly demanded feature to the otherwise almost perfect Porsche

Boxster: Comfort One-Touch roof operation while driving at slow speeds. The resulting product offered not only that, but also allowed quick and easy installation by just swapping out a relay box, thus leaving no traces and no permanent changes on the vehicle. The first SmartTOP roof controller was born.

The success of their first products in Germany and Europe prompted them in late 2004 to move operations to the USA, to be able to serve the American market as well as all other English speaking countries such as Australia, UK and South Africa from one central location. Their business has grown to a full fledged international corporation with an office in California and a full line of innovative products as well as distributors and installation partners all over the globe.

Being highly specialized in the development and distribution of after market roof- and comfort controllers since 2002 allows them to offer an unsurpassed level of competence and product quality. Their main goal is optimization of each individual product to a maximum in compatibility, usability and intuitive operation. They put greatest effort into development and quality checks of all their products to achieve this goal and meet all expectations of their customers.

All products are designed by a certified engineer, having years of experience on Porsche and Mercedes Benz vehicle electronics. They develop and manufacture according to all European and American (CE, FCC) directives and deliver state-of-the-art electronic onboard control units. Over-voltage protection, reverse polarity protection, safety shut-off and absolutely minimal standby power drain can be taken for granted.

The extraordinary success of their products is also based on the great communication with their customers, which usually already starts for each new product during the development and prototyping phase.
