

New version HARcad 3.1

Date: 01-15-2010 02:15 PM CET

Category: [IT, New Media & Software](#)

Press release from: [Intedis GmbH & Co. KG](#)

Wuerzburg, 15 January 2010. Intedis has completed the preparations for the rollout of the new HARcad version 3.1. The extension of the software by 27 new functions is increasing efficiency and improving the data-consistency in the daily routine of harness developers.

The additional functions in HARcad are now, amongst others, allowing the integration of mechanical CAD systems or the wire/current simulation within the diagram module. In addition to the material cost calculation this new version also covers the calculation of hours of work.

HARcad supports the complex harness development processes from conceptual design to calculation and change process. The intuitive handling and the adjustment of the functionalities according to engineers' requirements guarantee a short training period and fulfil the demand of time and cost efficiency. HARcad was developed by Intedis GmbH & Co. KG with headquarter in Wuerzburg, engineering partner and consulter supporting the leading automotive companies in all aspects of automotive electric/electronic architecture for several years. Due to the experience in the field of wiring harness development and the background of a leading wiring harness manufacturer, Intedis exactly knows the requirements harness engineers are challenged with in their daily work.
