18th January 2010

Transtelecom JSC, one of the leading telecommunication operators in Kazakhstan, and Telesens, the leading developer of complex software solutions for telecommunications, have concluded a contract to deliver Tinterconnect (T-IC), a settlement system for telecom operators and content providers.

“Our main aim is to raise the efficiency of our mutual relations with partners and clients and to supply new services to the market quickly and effectively. The complex, reliable and flexible system from Telesens will allow us to provide a higher level of service to our partners and to satisfy their growing requirements”, explained V. Milaev, the Vice President of Business Conduct at Transtelecom JSC.

“Tinterconnect is an effective solution that allows carriers to conduct business more dynamically and improve efficiency. Our system is already operating successfully in Kazakhtelecom JSC and this implementation reinforces our company’s presence in the telecommunications market of the Kazakhstan Republic”, Shamil Nazipov, Marketing and Sales Deputy Director at Telesens, commented.

Background Information

“Transtelecom” JSC was formed on September 1, 1999 for the purpose of guaranteeing the technical operation and modernization of the existing communications network of the National Company Kazakhstan Temir Zholy JSC. Prior to 2005, the company provided telecommunication services for railway enterprises in the Republic of Kazakhstan. However, in the last two years, they have substantially increased the client base and the company is now one of the largest operators of Kazakhstan. Today, Transtelecom JSC is one of the leading telecommunication operators in Kazakhstan, providing not only international, interurban, local telephony services and access to the Internet Network but also backbone links. More detailed information is available on the website.
