

## Print Manager Plus 2010 Now Supports Microsoft XPS

Date: 02-01-2010 10:40 AM CET

Category: [Business, Economy, Finances, Banking & Insurance](#)

Press release from: [Software Shelf International, Inc.](#)

Agency: [WorldWidePr.net](#)

Companies Save Up to 75% of Printing Costs

Palo Alto, California, Clearwater, Florida, and London, England

Print Manager Plus, the full feature, all software print monitoring, audit and accounting solution from Software Shelf International now includes full compatibility with the new Microsoft XPS® format to provide users with higher quality documents and higher print cost savings.

Now companies and organizations of any size can easily and fully manage printing on all brands of printers, control all print traffic and effortlessly manage all of their printing resources and printing budgets – throughout their network without resorting to expensive, complex and inferior hardware or other software solutions.

“XPS provides users with a robust, open and highly trustworthy format for electronic paper. Documents print better and can be shared more easily and are more secure for archiving.” Said Software Shelf CEO, Bill Feeley. “With the full auditing of Microsoft XPS files, Print Manager Plus remains on the cutting edge of Print Management technology.”

Despite increasing availability of paperless office solutions, the cost of printing continues to eat into many profit lines. Print Manager Plus 2010® is the leading print management solution for print administration and print cost reduction for all operating systems. It is the only fully functional all software solution available supporting all printers, plotters and multifunctional devices on the market today and monitors printing on all Microsoft, Macintosh, Unix, and Linux operating systems – and it does so at a fraction of the cost of any other IT product available.

Print Manager Plus is also a Green product featured by ‘Guide Me Green’ as software that is saving 150,000 trees every month due to the paper savings it achieves for its customers.
