Press release from: [Innov-X Systems](#)

The DELTA Line of X-Ray Fluorescence (XRF) Analyzers sets new standard in Field Portable XRF Analysis

WOBURN, MA USA - February 1, 2010 – Innov-X Systems, Inc., proudly introduces their new family of handheld XRF analyzers — the DELTA Line. The result of Innov-X's extensive field portable instrumentation experience and innovation leadership, the DELTA Line satisfies an urgent demand in the analytical industry. That is, a handheld XRF fully ruggedized to industrial standards — including no PDA or movable display — to withstand harsh environments while at the same time providing peerless analytical performance.

Innov-X founder and CEO Don Sackett remarked, "I am really proud of the accomplishments of our development teams. They've redesigned our analyzers from the ground up to create a true inspection tool that is both analytically superior AND rugged enough for virtually any environment – NO COMPROMISES. The DELTA analyzers feature the latest technology to optimize analysis throughput and uptime."

### Smart on the Inside

- Ultra fast measurements for high throughput
- State of the Art technology and redesigned geometry for outstanding analytical performance, speed and lower detection limits
- Excellent light element measurement capability in air or vacuum

### Tough on the Outside

- Weatherproof, rugged industrial grade body
- Superior field use ergonomics with overmolding and rubberized grip
- Rear facing, bright Blanview™ touchscreen display for superior visibility in bright or dim conditions
- External heat sink engineered for extreme temperature, high power use
- True hot swap battery capabilities – replace battery without restarting analyzer

Exclusive to Innov-X's DELTA Line of analyzers is their auto calibrating, auto charging docking station. With the unique, first of its kind DELTA docking station, operators never have to power their analyzer off – the station charges the analyzer battery and a spare, and periodically performs a calibration check. Remove the analyzer anytime for immediate testing – industrial efficiency at its best.

Analyzer upgrades and trade ins are available at any time. Our Zero Obsolescence, Zero Risk Guarantee demonstrates Innov-X's commitment to providing a clear path to our next technology. For more information on the DELTA series of handheld XRF analyzers or any of

Innov-X's other portable and on site XRF & XRD products, please go to: [www.innovx.com/products/delta](http://www.innovx.com/products/delta), call 866 4 Innov-X, or email [info@innovx.com](mailto:info@innovx.com).

### About Innov-X Systems, Inc.

Innov-X Systems, founded in 2001, is a global leader in rapid, on site XRF & XRD measurements. Innov-X provides real time, non destructive analysis where the answer is needed the most. Their full suite of on site x ray analysis products provide high performance elemental analysis for Mg thru U, ppm to 100%. Innov-X Systems has the breadth of XRF & XRD experience and range of product offerings to provide field hardened, high global service organization with worldwide operations, sales, and

service. Headquartered in the U.S. with R&D and manufacturing facilities, they have offices in Europe, Asia and Australia. In addition, sales and service (including installation & training) is available in over 100 countries.
