

Call Accounting for Mitel PBX Systems

Date: 02-09-2010 11:26 AM CET

Category: [Media & Telecommunications](#)

Press release from: [TEL electronics, inc.](#)

Mitel PBX Systems are installed in thousands of hotels and motels across the nation. In fact, TEL electronics, inc. (TEL), the leading manufacturer of call accounting systems for hotels, reports that over 83% of its call accounting systems are currently interfaced to a Mitel phone system. With more than 50,000 installations since 1980, TEL clearly understands the hotel industry and recognizes Mitel as one of the leading manufacturers of hotel PBX systems.

Mitel reports on its website that it is a “long-established and proven provider of hospitality-specific communications, worldwide.” It further explains that “Mitel’s standards-based solutions enable third-party applications like call accounting, guestroom phones, property management systems, and SIP products to interface with Mitel systems.”

One such third-party product family includes TEL’s INN-FORM call accounting systems. The INN-FORM XL, INN-FORM Plus, and the INN-FORM PC have been successfully interfaced to thousands of Mitel PBX systems. The INN-FORM XL and the INN-FORM Plus standalone call accounting systems are the most widely used and longest-lasting call accounting systems on the market today.

TEL’s website reports that its “call accounting systems are trusted by and have been installed in almost all major hotels in operation today. TEL products are installed in Wyndham, Best Western, Choice, IHG, Hilton, Marriott, Carlson, and many other chains and independent hotels to help track and bill for guest phone calls.” With such a large installed base, tens of thousands of hotels have selected TEL because of its ability to produce durable, easy-to-use, and affordable call accounting systems for the hospitality industry in the United States, Canada, and the Caribbean Islands.

Along with its solid reputation in the hospitality industry, TEL sells a great business call accounting product, the WIN-SENSE 32, a Windows-based software package.

Both the INN-FORM and WIN-SENSE 32 call accounting systems interface seamlessly with virtually all Mitel PBX systems. When it comes to call accounting for a Mitel PBX, the choice is obvious: TEL electronics, inc. Visit TEL’s website at www.tel-electronics.com or call 1-800-748-5022 for more information.

TEL electronics, inc. is one of the nation’s leading call accounting software providers. TEL has installed over 50,000 call accounting systems throughout North America. TEL offers two stand-alone call accounting systems, the INN-FORM XL and the INN-FORM Plus, as well as two software-based systems called the INN-FORM PC and the WIN-SENSE 32. To learn more about TEL, its products and services, visit www.tel-electronics.com.
