Press release from: [MAGE SOLAR GMBH](#)

The company is expanding its internal product development

Ravensburg (Germany), March 11, 2010 – MAGE SOLAR GMBH, part of the globally operating MAGE GROUP, is expanding its internal product development. Since January 2010 the department for Research and Development has been managed by the graduate engineer Heinz Schuld, an experienced expert of photovoltaics and fastening systems.

Heinz Schuld has been employed by the MAGE GROUP since March 2008. As the Technical Manager at MAGE ALU SYSTEMS GMBH the Austrian was in charge of the main business area of aluminum support systems. When MAGE SUNFIXINGS GMBH, the producer of fastening systems for photovoltaics and solar thermal systems, was established, he managed the entire technical design – from product development to production. The focus of his new role at MAGE SOLAR will be on the continual development of the entire product range, strengthening dialogue with customers and applied research.

“We are pleased that we have gained in Heinz Schuld an experienced engineer who will push on our development work with his extensive technology expertise,” explains Norbert Philipp, CEO of MAGE SOLAR GMBH. “We will gear our product development even more towards customer needs and the requirements of the various markets. In doing so we guarantee our partners innovative coordinated solutions for all areas of application.”

After he completed his studies at Vienna University of Technology, Heinz Schuld gained ten years of professional

experience. At Eurofox GmbH, a leading supplier of intelligent fastening systems, he developed as Technical Manager a support system for façades of passive houses.
