Pumacy Technologies AG takes process management to the next level and appoints Christian Kind as new division manager.

Bernburg, March 2010 – Christian Kind has been appointed as new division manager process management at Pumacy Technologies AG with immediate effect. In this role he will be responsible for coordinating all administrative aspects of the division as well as sales and marketing.

Since 2007 Christian Kind has been appointed deputy head of the division Virtual Product Creation of the Fraunhofer-Institute for Product Systems and Design Technology IPK in Berlin. In 2000 he became appointed head of the department of Product Creation Processes. In 1998 he was assigned as head of the department of Construction Management of the Institute for Machine Tools and Factory Management IWF of the Technical University (TU) Berlin. Since 1993 he was research assistant. He studied manufacturing systems engineering with particular emphasis on production technology at TU Berlin.

“There is a great potential for streamlining business processes in many companies. Real process improvement, especially in product development processes rarely occurs. Pumacy Technologies provides several strategies that enhance a company’s understanding of process effectiveness. Pumacy helps businesses to optimize their procedures, configure an integrated flow of information and develop methods for product life cycle management. We aim at enabling our customers to design cost efficient, high-quality processes and to develop their innovation potential,” explains Christian Kind.

Pumacy Technologies AG (www.pumacy.de) is a leading knowledge management solution provider. The comprehensive portfolio of products and services is based on an interdisciplinary approach covering knowledge, process, and innovation management. The knowledge management platform KMmaster® (www.kmmaster.de) is a technology to support individual knowledge management concepts.

Pumacy has customers who are known as leading manufacturers from the aerospace and automotive, as well as the plant and machinery industries. Pumacy has extensive references from significant international projects.
