

RITC (Pty) Ltd now offers Industrial Rope Access to its clients

Date: 03-18-2010 10:54 AM CET

Category: [Industry, Real Estate & Construction](#)

Press release from: [Rope Access Inspection & RITC \(Pty\) Ltd](#)

Industrial rope access is a form of work positioning developed from techniques used in caving. It solves difficult access problems, without using scaffolding, cradles or mobile elevated work platforms. Compared to conventional accessing methods for inspection and testing, rope access can be completed more quickly thus saving costs by reducing working hours. Additionally, as it minimizes disruption at ground level, it often allows work to continue during operations, minimizing down time.

RITC (Pty) Ltd in conjunction with Rope Access Inspection CC now offers its clients Industrial Rope Access, for testing and inspection of structures, structural surveys and for conventional and advanced Non-Destructive Testing. Often inspectors who are serving the Energy, Oil & Gas or Industrial Manufacturing sectors face hard-to-reach locations in the course of their work, and by using IRATA standards to perform Industrial Rope Access, this can easily be accomplished.

Worldwide rope access companies have delivered an exemplary safety record based on a commitment to thorough training and diligent operational procedures. All RICT (Pty) Ltd technicians receive extensive training and independent assessment under IRATA standards, and are required to undergo re-training every three years.

The rope access worker works from two ropes - a working rope and a back-up, safety rope - and is permanently attached to both. Each rope has a separate anchorage point. In the unlikely event of the working rope becoming damaged or unusable, the safety rope prevents a fall. The equipment used is regularly inspected and well maintained.

RITC (Pty) Ltd & their partner company Rope Access Inspection CC is in the process of becoming a member of the Industrial Rope Access Trade Association (IRATA - www.irata.org/). All rope access operational work carried out by RITC (Pty) Ltd is conducted in line with international guidelines.

RITC (Pty) Ltd is the South African leader and innovator in inspection, verification, testing and certification services.
