

GOEPEL electronic expands GATE Partner Program

Date: 03-19-2010 10:23 AM CET

Category: [Industry, Real Estate & Construction](#)

Press release from: [GOEPEL electronics Ltd.](#)

GOEPEL electronic announces the extended incorporation of the Danish company DSE Test Solutions A/S into the global alliance program GATE™ (GOEPEL Associated Technical Experts).

The focus of the cooperation is the development and practical implementation of new products and modules based on JTAG/Boundary Scan instrumentation as well as enhancements in the integration of JTAG/Boundary Scan products in existing test systems built up from DSE Test Solutions which will be delivered to customers worldwide.

“We had a lot of successful projects in the past”, says Frank Amm, the Corporate GATE Program Manager at GOEPEL electronic. “DSE Test Solutions has a highly skilled team with experts in the field of test equipment and test solutions. Hence, the admission in our GATE partner program was a logical step for us.”

“DSE Test Solutions have already been working with the GOEPEL electronic Extended JTAG/Boundary Scan test solutions for 5 years now, and have proven their ability to combine Bscan and functional tests taking advantage of the best from the two worlds”, says Lars Kongsted-Jensen, from the Nordic & Baltic distributor EP-TeQ. “Lately DSE Test Solutions have even done projects using the JTAG based CPU Emulation from GOEPEL electronic called VarioTAP in order to speed up flash programming and to make functional tests with better diagnostics.”

“It is a great pleasure for DSE Test Solution to enter the GATE program at the highest level as a Centre of Expertise (COE)”, said Peder Lomborg, General Manager of DSE Test Solutions. “We have worked successfully together with GOEPEL electronic and EP-TeQ for 5 years, where we have built up a high level of knowledge about boundary scan applications and integration of Boundary scan with functional test systems. It is important for DSE Test Solutions to be able to offer our customers the best available technology and innovative solutions, and GOEPEL electronic has proven to be the right partner for us.”

DSE Test Solutions, based in Horsens/Denmark, was incorporated into the GATE™ program at the highest level as a Centre of Expertise (COE).

About GOEPEL electronic:

GOEPEL electronic is a worldwide leading vendor of professional JTAG/Boundary Scan solutions and technology innovator of IP based instrumentation. With more than 100 product launches the company became the biggest innovator in the market within the last five years. A network of branch offices, distributors and service partners ensures the global availability of the products as well as the support of the more than 7,000 system installations. Founded 1991 and headquartered in Jena, Germany, GOEPEL electronic employs currently about 160 employees and generated a revenue of 17.9 Million Euro in 2009. GOEPEL electronic has continuously been ISO9001 certified since 1996 and has been honoured with TOP-JOB and TOP-100 awards for being one of the best medium-sized companies in Germany. GOEPEL electronic's products won several awards in recent years and are used by the leading companies in telecommunication, automotive, space and avionics, industrial controls, medical technology, and other industries. Further information about the company and its products can be found on the internet at www.goepel.com.

About DSE Test Solutions:

DSE Test Solutions is one of the leading companies in Scandinavia within development, specification and implementation of advanced test systems and test solutions. All solutions are customized to meet customer's specific needs and can be used as stand-alone or integrated Turn-key solutions. The core competences are: Mechatronics, combining advanced and complex mechanical and electrical test solutions. Test and Measurement software (LabVIEW and TestStand based), Boundary Scan, Fixtures (In-Line, manually operated and RF-shielded) and Statistical Process Control (SPC). Further information about DSE Test Solutions can be found on the internet at www.dse.dk
