Category: [IT, New Media & Software](#)

Press release from: [Ayonix Inc.](#)

Ayonix Corp., A leading supplier of Innovative Face Recognition Products and Video Analytics solutions including peripherals and biometric solutions, today, announced "PalmSecure".

“PalmSecure technology is a proven biometric authentication solution for Hospitals, Companies and time and attendance systems in the healthcare industry, as well as for Banks and other security applications. Customers started to realize the benefits of the superior security and reliability that PalmSecure technology provides,” said Sadi Vural, president of Ayonix Inc. “The PalmSecure solution is very well positioned to serve the price-sensitive market by replacing complicated passwords with a quick scan of the palm and providing a compelling total cost of ownership. It offers a highly accurate, contactless and easy-to-deploy solution in a convenient form factor that meets customers’ needs at a price point that is very favorable compared to other biometric solutions.”

PalmSecure technology uses a near-infrared light to capture a user’s palm vein pattern, generating a unique biometric template that is matched against pre-registered users’ palm vein patterns. It is a contactless authentication technology that offers an easy-to-use, hygienic solution for verifying identity. This advanced, vascular pattern recognition solution is highly reliable and in a form factor that is non-intrusive and generates extremely fast authentication. The PalmSecure device connects via USB to any PC or laptop. The interface included enables users to enjoy the simplicity associated with functionality while adding robust biometric authentication to enhance security and protect mission-critical information and systems.

The PalmSecure device is now available for purchase.

About Ayonix Inc.

Ayonix Inc. is a Japan-based company headquartered in Japan. Ayonix is a software company offering intelligent Face Recognition solutions for security surveillance and business intelligence applications. The company is a global leader in intelligent video technology and is propelling the adoption of Face analytics. Ayonix products are based on innovative technologies that provide customers with a single platform for Intelligent IP video solutions. The company has distributors and partners in all over the world.
