Press release from: [Secure Medical](#)

AccessRx.com, a trusted U.S. online pharmacy since 1998, has introduced a new Smartphone application that allows consumers to order medications privately and conveniently from almost anywhere they go.

The AccessRx.com (accessrx.com) Smartphone application allows users to easily browse and select one or more medications. Designed with a simple, four-step checkout process, the application is easy to use because of its seamless flow, large font and prominent buttons.

“Accessrx.com has always been at the forefront of technology when it comes to safety, security and also innovative solutions,” said Rich Bernstein, director of marketing for AccessRx.com. “Because the use of Smartphones has tripled since early 2009, a high percentage of our customers will appreciate this new ordering option.”

AccessRx.com provides lifestyle medications such as Viagra, Cialis, Levitra, Propecia and many others. Customers do not need to have a prescription in hand to place an order. A U.S.-licensed doctor considers each prescription request after reviewing a health/medical questionnaire filled out by the customer.

AccessRx.com now provides the most convenient way to order medications on the go. A prescription request can be completed in just a few minutes – while on a bus or en route to a meeting. Tens of thousands of customers have ordered safely and securely at AccessRx.com, and the number of Smartphone orders is increasing rapidly (including iPhone, Blackberry, Android, Symbian). AdMob reports that Smartphone traffic in February 2010 was up 193 percent over February 2009.

AccessRx.com provides only FDA-approved, brand-name medications that are manufactured in the U.S. The website keeps all orders completely private and confidential. Consumers who take advantage of AccessRx.com avoid spending time in a doctor’s waiting room, and the pharmacy. Medications such as Viagra are shipped discreetly right to the customer’s door – by the next morning in most cases.

Based in Tempe, Arizona, AccessRx.com has proudly served its customers for more than 12 years.
