Press release from: [Tuner Tools, llc](#)

Agency: **Offsite Resources, llc**

27 Dec 2006: Tuner Tools, llc - A new collaborative project in automotive tuning components yields new integrated tools for engine diagnostic & reflashing.

Innovate Motorsports has developed a plug-in to the popular open source ECUflash [www.OpenECU.org] application allowing full integration with their in-house Logworks software. This is a significant step forward to the automotive tuning community in general and specifically to those involved with tuning the late model (2001+) Subaru and Mitsubishi models, including WRX & EVO. With this LC-1/OpenPort combo and the ECUflash/Logworks software, you can now integrate ALL the important data together for real time data logging with accurate air fuel ratio information.

This is the first affordable and consumer oriented integration of OBD-II and Air Fuel Ratio data into a single view and with the ability to adjust the parameters, reflash the ECU and retest to see your results all in an single integrated view.

For additional detail about this combo package;
