Press release from: [QuickPay Money](#)

Zurich/Switzerland, August 10th, 2010 (openPR) – “QuickPay Money” is the right solution to make purchases online securely and at low costs. This financial web portal will offer international money transfers at US\$1 costs only and much more.

Everybody of legal age is entitled to open an account with QPM and can choose between different account types – current account – checking account – savings account – investment account depending on your preferences and use. The CFO of the company Mr Bastian Kampmeier describes “QuickPay Money” as a very sophisticated feature literally custom made for global acting individuals and companies alike who wish to combine, the instant payment possibility that is offered by “PayPal” with online banking and financial solutions offered by your house bank married to the 24/7 cash access that offers “VISA” or “Mastercard”, in a secure way online and at very cost effective terms.

QPM offers merchant solutions to facilitate instant online transactions and a wide range of financial and banking services at very attractive terms and conditions. With qpmoney.com we closed the gap between direct money transfers online and instant accessibility anywhere around the globe as for instance known by “Western Union”, but with the comfort of an online tool and at a very attractive price that allows a very low cost budget.

New Zealand’s very efficient law structure made it possible for QPM to propose a secure and reliable solution to consumers worldwide to take advantage of this very useful instrument to transfer money around the world in a safe way. Welcome to the next step in banking history. Bank services at realistic cost that adapt to the modern society and cater to today’s clients needs instead of expecting the clients to adapt to theirs. This innovative concept will change the banking service world for ever.

Since June 2010 “QuickPay Money” offers a very promising private equity investment opportunity to investors who are not frightened to take high risks to make high profits. “QuickPay Money” is a high risk investment with huge development potential in a very competitive market segment. More information are available at the qpmoney.com website. Do not hesitate to sign-up if you are interested in this high yield investment venture.

### About Us

QuickPay Money is managed by ACCS Ltd. an Auckland/New Zealand based financial company providing a secure and cost-effective online payment solution, backed-up by a private deposit insurance which guarantees your money up to US\$25,000 per account. With QPM your money is safe and you can make international money transfers within a couple of minutes within the QPM network and access your funds anywhere in the world through the “VISA” or “Mastercard” network. For “QuickPay Money” human service counts.
