

The FAST LSX Patented Polymer Intake Manifold System is now available at Tuner Tools, llc

Date: 01-02-2007 01:08 PM CET

Category: [Tourism, Cars, Traffic](#)

Press release from: [Tuner Tools, llc](#)

Agency: **Offsite Resources, llc**

Tuner Tools, llc has added the FAST LSX line of Intake Manifolds, Throttle Bodies, Fuel Rails, Fuel Systems & LSX Direct Port Nitrous Systems to their product line at www.TunerTools.com

Made from space-age composite polymer, the patented FAST LSX Multi-Piece Intake Manifold shows a 20+ horsepower increase over the LS1 intake and 15+ horsepower over the LS6 intake, with no loss of drivability or low rpm torque. Best of all, the FAST space-age *Amodel* polymer intake is 30 percent stronger than the stock polymer unit. Unlike aluminum intakes, the FAST polymer intake avoids becoming a power robbing heat sink. The LSX comes with integrated nitrous oxide injector ports and the ability to accept a larger than stock throttle body for increased air flow. In addition, the LSX Manifold has added material for porting and the top shell is interchangeable to accept the 78mm or 90mm LSX Throttle Bodies.

The entire line of products from FAST - Fuel Air Spark Technology will be added in the coming weeks, but this exciting new line of LSX Intake Manifolds & Fuel systems brings an exciting line for tuning big horsepower LS1, LS2 & LS6 systems.
