Press release from: [Inlab Software GmbH](#)

Grünwald, August 18,2010: The availability of IPv6 support with BalanceNG V3 has just been announced with immediate effect.

Based on this release, IPv6 support will be soon integrated with the BalanceNG OEM Appliances from SECUDOS and Thomas-Krenn.AG.

About BalanceNG:

BalanceNG is a software load-balancer and runs on Linux and Solaris operating systems. BalanceNG is the core load-balancing engine of the SECUDOS and Thomas-Krenn load-balancer appliances.

About Inlab Software GmbH:

Inlab Software GmbH, founded in 1991 is an ISV (Independent Software Vendor) located in Gruenwald near Munich, Germany. Inlab focuses on networking system software, load-balancing software, programming languages and security software. Inlab develops software for Linux and Solaris operating systems and develops both commercial products and Open-Source software.
