Agency: **OrderStorm Inc.**

August 31, 2010 -- Houston, TX - Rigid Building Systems, official sponsor of the Dreyer & Reinbold Racing team would like to congratulate them and driver Justin Wilson on his seventh place finish in the IZOD IndyCar Peak Indy 300 race in Joliet, Illinois. Dreyer & Reinbold will head home to Indianapolis to prepare for the 15th round of the 2010 IZOD IndyCar Series before heading to Kentucky for the Kentucky Indy 300 on September 4th. There are three races left in the season.

"I think we had a pretty good race car," said Justin Wilson, No. 22. "Everyone at Dreyer & Reinbold Racing had great pit stops and gave me a good car. We just tried to make sure that we made the most of it. It was pretty exciting those last ten laps. There wasn't any lifting happening. You had to keep it flat and look for the gaps. I'm just really happy to get a good result".

Rigid's IndyCar sponsorship promotes its line of steel buildings, steel churches, commercial and industrial steel buildings, airplane hangars and self storage buildings. Dreyer and Reinbold also promote Rigid's new steel buildings line - Quickie Steel Buildings.

Steve Olson, VP of Sales/Marketing for Rigid, says, "We are extremely excited to be in our third year of sponsorship with Dreyer and Reinbold and are having a terrific year." Rigid hosted their local builders for the season opener on March 28 in St. Petersburg, FL. "A lot of our builders attended the races. The race track promotions have been a great success and we are looking forward to an exciting finish for 2010," says Olson.

Rigid Building Systems is the leading manufacturer of steel buildings in the US. Their facilities employ state-of-the-art manufacturing and work flow processes to enable rapid building delivery. Rigid is also the industry leader in continuous product quality improvement. They have a nationwide network of builders ready to help customers create innovative and economical steel buildings ranging from small standard style buildings up to large complex projects.
