Press release from: [Terraine, Inc.](#)

KNOXVILLE, TN, August 25, 2010 — Terraine Technology (a division of Terraine, Inc.) announced today that it would be offering free, 1-year, limited use trials of the Adesso Server and Client to new customers via its website (myadesso.com). These trials will be limited to three users per account and 100MB of storage space. Each of the three users may install the Adesso Client on up to three different devices (e.g., a desktop, laptop, and tablet). Demonstration applications will be available on the server so that users may view and modify existing applications as well as create their own.

“By offering a free, year-long account, people looking for data collection solutions will be able to try the best, without risk. They can use the applications already in place or create their own to share with others.” – Rick Beckley, Project Manager – Terraine, Inc.

Terraine, owner of the Adesso Technology Platform, specializes in the development of cost-effective solutions for automating and improving data collection with or without Internet connectivity. Terraine uses Adesso to easily customize applications that are built specifically for each client’s needs. This makes applications unique and functional for our clients. The Adesso system has benefited clients around the world in many ways, including improved data collection quality, accuracy, completeness, and efficiency.

Terraine, Inc. (an SBA-Certified HUBZone company and SDB) specializes in environmental and technology consulting. Headquartered in Knoxville, TN, Terraine also has offices in Nashville, TN; Charlotte and Raleigh, NC; and Staunton, VA. Terraine is a leader in providing optimized environmental and data capture services using state-of-the-art database and Internet technology systems.
