SoundGraph launches new product with API for third party developers which is also available as open-frame modul

Gilching, September 2nd 2010 – New 8.9 inch FingerVU 895S Touch Screen USB auxiliary Mini Monitor developed by SoundGraph is now available for B2B customers from Display Solution.

The FingerVU 895S with 1.024 x 600 screen resolution can run independently from the computers primary desktop, just as well as SoundGraphs existing 4.3 inch FingerVU 436 and the larger 7 inch FingerVU 706. All models are resistive touch screens with trendy USB connection and delivered with the new conceptual touch control interface FingerUI. By default users are easily enabled to play media files like music, video, photo or YouTube as well as getting the widget information like news, world city weather, time, memo and more.

For industrial applications there are ODM/OEM FingerVU touch screen monitors (open frame) available. Also SoundGraph will release the API for third party developers to adapt the FingerUI module or use FingerVU for their B2B purpose. FingerUI supports Windows 7, VISTA and XP and can be run under normal desktop and laptop environment.

SoundGraph launches FingerVU 895S on IFA 2010 in Berlin, Hall 14.1, booth 114.
