

Window Tint Meters. Approved For All State Programs

Date: 01-10-2007 03:41 PM CET

Category: [Business, Economy, Finances, Banking & Insurance](#)

Press release from: [Monroe](#)

The Pocket Detective two piece Window Tint Meter provides a compact, rugged and easy to use measurement system that measures light transmittance and light reflectance through roll down and fixed (front and rear) automobile glass.

The Pocket Detective two piece Window Tint Meter was the first Window Tint Meter that can read both light transmission and light reflectance. It is the only meter in the world that has these capabilities. With patented technology, and an industry leading Window Tint Meter warranty, the Pro Motorcar Products two piece Window Tint Meter is the most widely used two piece Window Tint Meter on the market today. Our Window Tint Meter is approved by more states, and has been exclusively selected by more state inspection programs, than any other two piece Window Tint Meter available on the market today.

Other Window Tint Meters that measure fixed glass are not approved by all states and can give false Window Tint readings that can lead to unwanted legal disputes and costly court expenditures. Protect your business today by purchasing the best two piece Window Tint Meter on the market, the Pro Motorcar Product Pocket Detective Window Tint Meter.
