

Travel-Buggy Lightens the Load for Visiting Babies

Date: 01-16-2007 08:35 PM CET

Category: [Tourism, Cars, Traffic](#)

Press release from: [Travel Buggy Services Inc.](#)

Travel-Buggy is the only company of its kind in Montreal. Lisa Knight, President of Travel Buggy Services Inc. (www.travel-buggy.com) started the baby equipment rental business in April 2006 to service a currently untouched market.

Visitors with babies and small children can now rent strollers, cribs, highchairs and a host of other essential baby items when they stay in Montreal and surroundings, rather than having to bring all their bulky baby equipment with them. Likewise, Montrealers expecting family and friends travelling with small children can profit from this service without having to buy and store these cumbersome items.

Baby equipment rental is becoming a booming business now that increasing numbers of families are travelling for pleasure AND business. An estimated 70,000 children between the ages of 0 and 2 spent one night or more in Montreal in 2005. That's a lot of potential business for a small company!

Travel-Buggy was borne of an idea Lisa had whilst planning a vacation for her family. "We wanted to take as little as possible with us, and wondered if we could rent car seats and a stroller at our destination". In the U.S. alone, there are over 200 baby equipment rental companies operating, but elsewhere in the world it's still a new phenomenon.

Parents will be secure in the knowledge that they can rent safe, clean equipment for their short-term stays in Montreal and surroundings. Travel-Buggy delivers and picks up all equipment, leaving the visitor more time to enjoy their vacation.

Have fun in Montreal, and forget about hauling all of your baby equipment! Travel Buggy makes it easy to enjoy your trip. Contact us today.

In operation since April 2006, Travel Buggy Services Inc. is a family-run baby equipment rental company specialising in short-term rentals of cribs, strollers, car seats etc. in the Montreal area.
