Press release from: [CTI](#)

CTI, San Diego, CA. welcomes Chris De Gárate to its Technical Support department. Mr. De Gárate brings his expertise and broad technical support experience, to the CTI team.

Mr. De Gárate will be working with CTI's Technical Support team to support its complete range of production management/reporting solutions; including CorrTrim .NET; the newest iteration of CTI's industry-leading corrugator scheduling solution.

About CTI: CTI provides quality planning, business, and communications software and services that increase productivity and optimize resource utilization for our customers in the corrugated packaging industry. Our software solutions increase the efficiency of box plant operations through improved scheduling and communications. The modules form a seamless, integrated package that fits into the various computer integrated manufacturing environments of our customers.

With a record of superior results spanning 25 years, CTI is dedicated to helping our customers maximize performance and maintain a competitive edge. Discover how CTI can help your company improve efficiency, reduce waste, and increase profits; for more information visit, [www.corrtech.com](http://www.corrtech.com).
