

Concrete- and cement testing - ratioTEC GmbH, Langenenslingen/Germany

Date: 02-14-2007 03:28 PM CET

Category: [Industry, Real Estate & Construction](#)

Press release from: [Michael Richter - International marketing and sales consultant](#)

Fast and rational testing of construction materials ist the daily business of construction companies and/or special laboratories.

ratioTEC, Langenenslingen/Germany (ratiotec.com) has based on more than 30 years experience in construction and production - specialized in the production of machines, testing devices and accessories.

Due to the variety of hte offered products the website has been newly designed and offers to its visitors fast results when searching for testing products - from machinery to test cement or concrete through laboratory measuring and testing devices to different accessories and synergies or cooperation-possibilities.

One of the focal points are complete laborotories with which leading companies and laboratories have been equipped.

Companies like VDZ (German centre of cement testing), Aalborg Portland AS, various branches of Dyckerhoff, Schwenkzement, Heidelbergcement and many others are part of the reference list.

Another priority is equipping universities as well as special schools, like e. g. University of Potsdam, University of Stuttgart, training centre in Selb and others.

Many projects are shown on the website - including pictures and description.

Worldwide deliveries include foreign branches of the reference clients as well as e. g. SHUWAIKA, Grenzebach China, DHT China, etc. The multiplicity of special products includes also special tension testing machines for wood, steel, screws, bricks ... ar whatever the client needs.

In all tasks - from the first contact to after-sales-service - customer benefit ist the abosulte focal point.
