

Shuttle brings some colour to your day: Small form factor PCs from the market leader get a colourful touch

Date: 04-16-2007 07:05 PM CET

Category: [IT, New Media & Software](#)

Press release from: [Shuttle Computer Handels GmbH](#)

Shuttle Inc., the small form factor (SFF) PC market leader and manufacturer of multi form factor solutions, is now offering three fully configurable systems with exceptional designs in the Shuttle Systems Configurator, allowing you to choose the equipment and motifs you would like through the Internet.

Until now, with the exception of limited edition models or coloured XPC covers, Shuttle has offered PCs exclusively in silver and black. “With Spring come three new models in the strong, but also fresh colours of red, green and blue,” explains Tom Seiffert, Head of Marketing & PR for Shuttle Computer Handels GmbH. “And their computer generated angular and rounded shaped motifs reflect the dynamism and modernity of our products.”

The three new models are not only great looking, but also technically advanced, and in the Shuttle Systems Configurator you can select processors, memory, graphics cards, and drives to suit your individual needs. Based on Intel Core 2 Duo processors, for example, you can put together a fully configured system to suit every need, with up to four GB of memory and a 500 GB hard drive.

The brightly coloured Shuttle XPC G5 3210S, G5 3220S and G2 3210S can all be found in the “Limited Collector’s Editions” section of the Shuttle Systems Configurator. All three models are based on the Shuttle XPC Barebones SD32G2 and SD32G5.

Shuttle’s recommended retail price for the XPC G5 3210S is EUR 931*, for the XPC G5 3220S EUR 931*, and the XPC G2 3210S EUR 881*, the Shuttle XPC Barebones SD32G2 EUR 265, and the Shuttle XPC Barebones SD32G5 EUR 289 (without VAT). All of these products are available now.
