

## Two-way communication with ArtWeb

Date: 04-20-2007 06:02 PM CET

Category: [IT, New Media & Software](#)

Press release from: [ArtWeb LLC](#)

Hence, visitors of ArtWeb LLC blog are able not only to enjoy reading useful and interesting articles and viewing samples of creative designs but also they can establish so-called two-way communication. From the one hand there are clients and their wishes concerning the templates they want to see in TemplatesFlow store in the future. From the other hand there is a team of professionals who are able to make a reality of these wishes. It's the main goal why this new section has appeared. Visiting it potential clients have a good opportunity to take part in the process of web templates creation. By leaving a message with recommendations and description of the template they want to have for business company or some other firm, they make a so-called previous order but without paying a cent for this. Later they'll get a reply from ArtWeb with confirmation of the ordered web template readiness and direct link to view it. However, they are not obliged to buy it. If they don't like it they can leave another comment expressing their opinions and remarks. In addition visitors of ArtWeb LLC blog can take part in different polls about templates themes, i.e vote for or against some theme or add new one.

«We want to be closer to our clients, that's why we've decided to open this section.» - says Steve Jones, the marketing manager of ArtWeb LLC. - «Now you have a good opportunity to order template accordingly to your own taste instead of choosing among represented ones. Maybe we take no notice of some sphere of human activities and because of it you can't find the template separately dedicated to your business. Don't hesitate to leave your recommendations. Nothing is lost for asking»

About TemplatesFlow.com

TemplatesFlow.com is one of the most perspective projects of the ArtWeb LLC. It's a convenient and high technological web resource on which our customers can find the necessary web templates for producing their own web sites. TemplatesFlow.com suggests a wide range of templates types.
