Press release from: [epcSolutions](#)

epcSolutions to demonstrate TetraGate 2 using Zebra Technologies RFID card printer at RFIDJournal Live.

Great Falls, VA – epcSolutions, Inc. the worlds most installed Wal*Mart RFID solution provider announces the first application leveraging Zebra’s RFID Gen2 card printer. The new printer from Zebra Technologies allows RFID enabled plastic ID cards to be simultaneously printed and encoded. The encoded ID cards can be used for a wide range of identification scenarios such as driver’s licenses, student ID cards, loyalty and VIP cards, access control cards, returnable asset cards and passport cards.

The cards form the nucleus for epcSolutions’ TetraGate 2 RFID and biometric access control system. With these printed and encoded cards, it is possible to obtain a read range of 20 to 25 feet for access control. These cards can also be used for fixed asset tagging with epcSolutions’ FixedAssetManager application, allowing you to print and encode tags for fixed assets, as well as work in process in conjunction with WorkInProgressManager.

“The encoded cards provide the extended read range needed to solve access control and security issues such as tailgating and buddy badging with TetraGate 2,” states Rick Kail, Director of Security at epcSolutions. “This printer has many uses for multiple applications, which is exciting for the industry at this time.”

“As a system integrator working with epcSolutions, we are very excited about the new Zebra RFID card printer,” states Dwain Farley, CEO Domino ISG. “The printer and cards will allow us to implement a wide variety of applications using epcSolution’s software.”

The printer has two available models, single sided and double sided printing, depending on the application and need. Contact epcSolutions for more information.

About epcSolutions, Inc.

epcSolutions, Inc. is the leading provider of RFID compliance software to the Wal*Mart and DoD supplier community. RFIDTagManager’s point and click wizards allow users to be compliant in under an hour. RFIDTagManager supports RFID hardware from leading vendors including Symbol, Zebra, Printronix, Alien, Intermec and others. RFIDTagManager provides a standalone data entry solution out of the box and is easily integrated with any ERP, WMS or database system such as JD Edwards, SAP, Oracle and IBM’s AS400 system to provide automated order import and label printing operations.
