

## **epcSolutions and Domino ISG to demonstrate RFID GEN 2 work in process product at RFID Journal Live**

Date: 05-02-2007 03:34 PM CET

Category: [IT, New Media & Software](#)

Press release from: [epcSolutions](#)

epcSolutions announces WorkinProcessManager™. See us at RFID Journal Live in Domino ISG's booth 317.

Great Falls, VA – epcSolutions, announces the immediate availability of WorkinProcessManager, extending its support for GS1 and epcGlobal's RFID Gen 2 standards. epcSolutions is now the only solutions provider with a complete RFID software platform for all asset types – work in process, finished goods/inventory, fixed assets and people.

“We are very pleased to add another strong product to the “Any Asset, One Network™,” family of products states Kevin Kail, CEO epcSolutions. “Tracking work in process has been a very important topic to our resellers and their end users and with this easy to use product we can offer a complete solution to those needs.”

WorkinProcessManager, built on epcSolutions' SensorOS, allows the ability for end users to be able to track their work in progress, within one or multiple locations, allowing the ability to track when an item or project was started, and when it was completed. WorkinProcessManager has the capability for maintaining work in progress inventories, integrated barcode asset tag printing/encoding, generating reports and has easy to use wizard based software.

“Our first installation tracks computer chips as raw materials that go into finished circuit boards.” states Chuck Williams CTO, epcSolutions. “The finished boards are shipped to a second site along with an electronic Advance Shipment Notice (ASN). Once the boards arrive at the other site, they are checked in and a receipt report is sent back to the originator,” Mr. Williams continued.

WorkinProcessManager is available through epcSolutions' distribution partners. Please call us at 703-757-4470 to request a webinar or for your evaluation copy of WorkinProcessManager.

About epcSolutions, Inc.

epcSolutions, Inc. is the leading provider of RFID compliance software to the Wal\*Mart and DoD supplier community. RFIDTagManager's point and click wizards allow users to be compliant in under an hour. RFIDTagManager supports RFID hardware from leading vendors including Symbol, Zebra, Printronix, Alien, Intermec and others. RFIDTagManager provides a standalone data entry solution out of the box and is easily integrated with any ERP, WMS or database system such as JD Edwards, SAP, Oracle and IBM's AS400 system to provide automated order import and label printing operations.
