CEO Sigurjón Þ. Arnason:

"Landsbanki's performance in the first quarter of 2007 was very gratifying. The bank's after-tax profit was around ISK 14bn and its ROE 45%. Income generation comes from a solid and broad base, as reflected in the strong growth of core income, which was up 17% from the previous quarter and 31% over the same period of the previous year. Integration of our subsidiaries and establishment abroad has progressed rapidly and supports the bank's successful international strategy aimed at serving mid-cap companies. Strong deposit growth continued this past quarter, in particular through Icesave. Currently 62% of Group lending is funded by deposits, reinforcing its balance sheet considerably. It's no exaggeration to say that the year has begun well at Landsbanki."

CEO Halldór J. Kristjánsson:

"The Q1 results, with very high profit and profitability, clearly reflect Landsbanki's strong position. The turbulence of past quarters concerning Icelandic financial enterprises appears to have subsided. Moody's has upgraded Landsbanki's ratings following its adoption of new JDA methodology. As a result, the bank's rating rose by two notches, from A2 to Aa3, and its financial strength outlook was changed from negative to stable. CDS spreads on Landsbanki's bonds have been dropping and currently range around 20-22 bp for a 5Y maturity. An improved rating, high growth of overseas deposits and strong liquidity, together with continuing very credible growth of net interest and commission income, are all indicative of this quarter's positive outcome."
