

Shuttle XPC Barebone SD30G2: a cost-effective small form factor PC with Intel chipset

Date: 05-08-2007 02:19 PM CET

Category: [IT, New Media & Software](#)

Press release from: [Shuttle Computer Handels GmbH](#)

Shuttle Inc., small form factor (SFF) PC market leader and manufacturer of multi form factor solutions, today introduced another compact XPC Barebone supporting Intel Core 2 Duo processors and Windows Vista.

Taking advantage of Intel's 945GC chipset, Shuttle's silver XPC Barebone SD30G2 is able to offer a very reliable platform on which to build a fully configured system for the office. It supports modern and energy-saving processors such as the Intel® Core 2 Duo™ E4xxx series with 800 MHz FSB and, with its fast dual-channel DDR2 memory (up to 2 GB), and space for a big Serial ATA 300 hard disk, Shuttle's latest innovation is a more than competent companion for your daily office requirements.

Faster access to data networks: Shuttle's gigabit-LAN guarantees maximum data transfer throughout your company's network. Also, the SD30G2 is able to run Windows Vista's 3D interface without any problems, thanks to its integrated DirectX 9-compatible Intel GMA950 graphic function. And for even greater 3D graphics performance, you can fit the PCI Express X16 slot with an up-to-date graphics card.

Shuttle's patented Heatpipe Cooling technology, with its intelligent speed control, automatically makes sure that everything is taken care of inside of the high-quality aluminium Shuttle XPC SD30G2, and so ensures the greatest stability and super quiet operation.

Finally, a powerful 250 SilentX power supply, 8 channel HD-audio, 6x USB, 2x Firewire, and a 32 bit PCI slot round off the equipment of this only 300(L) x 200(W) x 185(H) mm computer.

The Shuttle XPC Barebone SD30G2 is available from official Shuttle distributors now. Shuttle's recommended retail price is EUR 215.00 (without VAT).
