Press release from: [CODIXX AG](#)

Barleben - Germany, 10.05.2007 - As of April 1, 2007, the responsibility for the manufacturing plant of colorPol® polarizers has been given to André Volke.

His predecessor, Dr. Heine, had been in charge since 2001 and is now recently retired. Under the leadership of Dr. Heine, the development and completion of the manufacturing facility for the glass polarizers was successful.

Until his recent promotion, Mr. Volke, one of the founders of CODIXX AG, was Manager of Research & Development. In his new role, he will take over the responsibility for the core business of the CODIXX AG, a dynamic growing company.

Based on high performance and flexibility of the colorPol polarizers, CODIXX AG owns a preferred market position. Under the direction of André Volke, a continual steep growth of the colorPol business can be expected for years to come.

As a result, Marketing and Production will now become separate departments and will be staffed as the company grows. With these improvements, CODIXX AG will be strengthened and positioned positively in the market place for the anticipated growth of the company.

The CODIXX is a German company, established on September 1st, 1998, to deal with is the development, the production and the marketing of dichroic glass polarizers, that are sold world-wide under the tradename colorPol®.
