Press release from: [Zelfi AG](#)

Head on a Stick is a macabre game where the player of this mobile phone game has to balance bodiless heads on a stick with a good reaction. A series of heavier and smaller heads increase the difficulty on each level.

Additional points are counted when the head is kept in a good balance.

In an amusing competition mode this absurd game can be played with friends. But there must be shown a good performance in balancing heads to challenge rivals and to make a good score. The high score can be saved on the mobile phone and online at www.rumblex.com.

The mobile game Head on a Stick is a development of Under Siege Studio and is now available at www.zelfi.com/en/mobile-games/games/head-on-a-stick/ for € 2,99.
