

PATENT PENDING TECHNOLOGY REDUCES HIGH SPEED HAND DRYER NOISE

Date: 01-28-2012 10:58 AM CET

Category: [Industry, Real Estate & Construction](#)

Press release from: [American Dryer Inc.](#)

Agency: **Magnolia Heights Marketing**

Hand Dryer noise makes it hard to carry a conversation while drying your hands. For years hand dryer manufacturers have been working on this problem with little to no success. Until now.

American Dryer Inc. has patent pending technology that will allow a facility to adjust their hand dryers air speed to provide the perfect balance of sound and speed. The sound level can be reduced to the same level as a conventional hand dryer while still drying faster.

American Dryer Inc. has been creating quality hand dryers since 1952. The Rabahy family acquired the company in 1985. Since the acquisition, American Dryer has become one of the largest hand dryer manufacturers in the world. The company builds and tests all of its products in the USA to the highest quality and environmental standards.
