

Net Geek Solutions Quick Shopping Cart Ecommerce Store Software Now Links with Quick Books

Date: 04.04.2008 - 12:28

Category: [Business, Economy, Finances, Banking & Insurance](#)

Press release from: [Net Geek Solutions](#)

Quick Shopping Cart®, the online ecommerce store utility offered by Net Geek Solutions (ngshost.com), now interacts with QuickBooks® financial software. This technology allows business owners to save valuable time and more effectively manage their Web store by synchronizing critical business data between their store and QuickBooks. Users can also take advantage of a QuickBooks Merchant Services account to accept all major credit and debit cards and reconcile Quick Shopping Cart payment data directly in QuickBooks.

Quick Shopping Cart® offers an easy-to-use wizard for users to quickly develop a successful Web store. In just six steps, merchants can go from purchasing the product to having a fully developed online presence.

“Many companies are under the impression that they must invest thousands of dollars to get an ecommerce store up and running. With Quick Shopping Cart®, entrepreneurs and small business can have a full-feature online store for as little as \$16 per month,” says Net Geek Solutions president Christine O’Kelly.

O’Kelly says that similar custom built ecommerce stores regularly require budgets of \$10,000 - \$25,000 or more. The Quick Shopping Cart® utility offers an alternative to custom built ecommerce stores with a highly customizable platform that business owners can easily tailor to meet their needs.

In addition to interacting with QuickBooks®, Quick Shopping Cart® includes over 75 free built in features including order tracking, inventory management, intuitive search features, coupon manager, real time payment processing and more.

For a limited time, Net Geek Solutions will also include free Google Adwords credits for new customers who choose any of the 3 Quick Shopping Cart® plans.

“Quick Shopping Cart is designed with the philosophy that anyone, regardless of their technological ability, should be able to create, manage, and enjoy a full-featured ecommerce store at an affordable price,” says O’Kelly.
