

TOPEX to Launch New Version of Bytton Router

Date: 06-29-2007 01:46 PM CET

Category: [Media & Telecommunications](#)

Press release from: [TOPEX](#)

New version of TOPEX Bytton router is released.

TOPEX is proud to introduce a new version of Bytton wireless router incorporating innovative features such as the DUAL SIM technology which permits the unit to automatically switch networks in the event of one network failure, IPSec VPN, L2TP, PPTP tunnels over the internet with complete security.

The router acts as a voice cost optimizer tool for fixed to mobile calls with Least Cost Routing capability.

The unit allows PoE deployment targeting markets like the security and surveillance sector with mission critical applications.

The new Bytton HSDPA ROUTER with download speeds of up 3.6Mb/s provides users with fast mobile access using the latest HSDPA technologies.

The Bytton router is a 3G cellular router that provides high speed wireless connectivity for primary wireless broadband network connectivity to equipment at remote locations, as well as for a backup to existing landline communications. Applications include SOHO, POS/retail, banking (ATMs), video surveillance and more.

We recall here the fact that TOPEX was the first to launch on the international market the following equipments:

- The first WiFi HSDPA Router, CeBIT Hanover 2006
- The world's first module embedded UMTS Fixed-Mobile Terminal, CeBIT Hanover 2005
- The first EVDO interface (Bytton), Tampere 2004, Finland
