Press release from: [Qulix Systems](#)

For 7 years of its existence Qulix Systems has grown up from a newbie to one of the leading software development companies in Belarus. One of the determinative driving factors for its growth was an active position in quality assurance domain of software products and innovations that were regularly introduced into marketing politics and client services of Qulix Systems.

“We have been working for seven years with the intention of making software and mobile solutions available for a bigger amount of interested customers. New types of services and technological platforms were used, innovative approaches to software solutions development of all level kinds introduced, technological platforms and first-class solutions for quality support were explored and also brought to life. A new stage in the company’s development allows us to gain a new vision of mission of Qulix Systems. This is a rule for providing excellent quality of our software solutions and competitive advantage to our customers on a world marketplace. The direction for providing quality and front line approaches in all areas of the company’s activities was determined as a way-to-go for a next turn to a company’s strategic development’, Chief Executive Officer, Qulix Systems, Alexey Makarov, mentioned.

Pricing policy of Qulix Systems together with high quality of services provided gave additional competitive advantages for our clients. The company is actively expanding the scope of its activities and confidently entering the market. Last year a new representative office in the United Kingdom was opened.

Quality procurement is one of the important competitive advantages of Qulix Systems that has always been of paramount importance. The company releases new software solutions, expands new and advanced technological opportunities for its clients and is an active participant of all processes aimed to provide understanding and knowledge of high- tech necessity for a prosperous business development in Belarus today.

Prosperous results of the company’s growth are acknowledged in its increasing income.

Qulix Systems today is an independent business unit which successfully represents IT brand in CIS countries and Europe. The company administers ethical business with active share in the social support and humanitarian projects.

About Qulix Systems:

Qulix is an offshore custom software development company and IT solutions provider based in the UK, with offshore facilities located in Russia and Belarus. It has been successfully operating for almost 7 years and currently employs more than 150 qualified software engineers and managers. Our powerful combination of business process analysis and technical expertise enables us to provide a wide range of IT services across a number of industry verticals, these include: procurement and logistics, finance & banking, telecommunications, insurance, healthcare and manufacturing.
