Press release from: [Shelving, Inc.](#)

Agency: **Brand Labs**

Prefabrication is a practical, modern way to maximize space and delineate limits and boundaries in any work environment.

Auburn Hills, MI--Shelving, Inc. (shelving.com) announces it now provides a complete line of high quality modular office systems. Modular offices are prefabricated buildings that are easily moveable and reusable with maintenance free wall surfaces. Modular offices are faster to install and provide greater stability and affordability than conventional construction methods.

"The ability to disassemble a room and relocate it elsewhere or redesign the layout for another application gives owners maximum flexibility," said Joe Schodowski, president of Shelving, Inc. Prefabricated systems are ideal for project offices, home offices, factory premises, and even office interior furnishings.

The main advantage of modular offices is the ability to use a fast seven-year depreciation rather than 39.5 years with conventional construction, providing a tremendous 33% price advantage. There is a significant tax savings too because of faster depreciation schedules than site-built walls. With Shelving, Inc.'s onsite consultation, drafting and engineering services, construction of prefab buildings, and installation of our products all from one source, the walls are installed 75% faster than conventional construction. Other modular office benefits include the following:

Durability

The structure of prefab offices tends to be far more durable and sturdier than other office construction methods. Modular offices are often the result of the combination of scientific research and architectural expertise. Components of prefab offices are built to take on the destructive contingencies that can happen from transporting to installation stages.

Set-up Wastage Elimination

By using modular offices, construction wastage is not only reduced but eliminated. Building modular ensures that various raw materials used are not exposed to the sun and the rain--eliminating decay and deterioration.

Theft Prevention

Theft is also discouraged, as different office components are tailor-made to fit other components, there'd be no point in

stealing the parts without taking all the compartments as a whole. Additionally, delivery of prefab office parts is made just in time for actual set up.

Shelving, Inc. and its recently enhanced e-commerce website, www.shelving.com, provide affordably modular offices, modular buildings, mezzanines, exterior buildings, portable buildings, customized powder coating rooms, clean rooms, and installation services for manufacturing plants, warehouse and distribution centers. Those interested in modular office systems, please call Shelving, Inc. directly at 800-637-9508, visit them on line www.shelving.com or stop by their Auburn Hills corporate office located at 32 S. Squirrel Road in Auburn Hills, Michigan.
