Press release from: The-HealingCodes.com

At the beginning of human history, both medicine and healing were a spiritual function. When we became sick we consulted God and prayed for healing. Next came the era of botanical medicine, when people took herbs in order to heal. This was followed by the era of physical medicine, where saws and scalpels were used as a means of surgically removing tumors and growths considered as the cause of disease. Currently we are in the chemical era, with our myriad drugs and their myriad side effects.

If one begins to comprehend frequency and the dynamics of plasma physics, which was espoused by Einstein in 1925 in his famous equation $E=MC^2$, one begins to understand that absolutely nothing is impossible. Dr. Ben Johnson believe's that we are now beginning to comprehend and use energy in ways that were only conceived of in the past, and which are returning us to a greater understanding of our bio-energetic nature. It's as if Buzz Lightyear has come to life and is urging us "to Infinity and beyond!" It is going to be a great adventure in learning and healing.

www.The-HealingCodes.com has made a bold leap into the realm of energy healing. It has avoided the mysticism that usually surrounds such therapies. It is philosophically and scientifically sound. Not to mention that it works ! Dr Ben Johnson (cancer clinic in Atlanta) is living proof of that!

Dr Ben Johnson upon receiving two separate diagnosis of amyotrophic lateral sclerosis, commonly known as Lou Gehrig's disease. Discovered eighty percent of people with Lou Gehrig's disease die within 5 years of developing symptoms, and he had been experiencing them for at least a year! After only three months of practicing www.The-HealingCodes.com, he returned to the surgeon who first diagnosed him. He ran the test for Lou Gehrig's (EMG) and found it to be 100% gone. He has been symptom-free for more than a year now.

Savely Yurkovsky, MD, founder of Field Control Therapy (FCT) stated that the energetic domain is the most fundamental in the regulation of homeostasis and is the true source of health and disease. He notes that we cannot have disease without having first an energetic disturbance in the cells and organs, rendering the energy flow ineffective. He further points out that there are three predominant regulating domains in the human body, all of which are energetic in nature: 1) Electromagnetic, 2) Electric, and 3) Bio-Chemical. Every cell in the body has electromagnetic fields (EMF), electricity, and bio-chemical make-up. Electrical fields carry information data. Each cell contains field data. Each thought field contains data.

Energy Medicine may be considered a hoax in some peoples minds but 2 of the most respected people in their fields believe it may well be the answer to the world's health care crisis
