Press release from: [Zelfi AG](#)

Chess is one of the world's most popular games and now available to play on mobile phones. This is good entertainment on the way and ambitious amusement for chess players.

Train your skills of strategy and tactic. Risk a game of chess against the computer. Chess is played on a square board of eight rows and eight columns of squares. Normally a board game and token is used to play. But the great advantage of the mobile game is that no pawn is dropping from the squared board any more.

With chess on the mobile it is easy to have a short match during the daily routine.

This exhilarating mobile game is funded by adverts and may be downloaded for free at www.zelfi.com/en/mobile-games/for-free/mobile-chess-free/. It is also available without adverts for Euro 4,99 at www.zelfi.com/en/mobile-games/games/mobile-chess/.
