

Free 6 Lesson Basic Course on Radio Frequency Identification (RFID) Technology

Date: 08-10-2007 03:17 PM CET

Category: [IT, New Media & Software](#)

Press release from: [SkyRFID Inc.](#)

The consultants and suppliers of RFID solutions, SkyRFID decided they wanted to help business people understand what RFID technologies are available, components, standards, and how they can be used in business to improve profitability. They designed a Free 6 Lesson 6 Day course that provides a good overall education on RFID for those wishing to educate themselves on this valuable technology.

SkyRFID Inc. has announced a Free RFID Basics Course that is delivered right to your email address.

SkyRFID Inc. is now offering Free RFID courses to help people and businesses understand RFID technology and how it can be used to improve their efficiencies and bottom line profits. You get to learn the basics of Radio Frequency Identification (RFID) in 6 Easy to Understand Lessons; one delivered each day.

Most businesses have never used RFID and aren't fully aware of what RFID can do for them; nor are they aware of all the different constraints that need to be addressed in order to realize the full benefits of an RFID solution. SkyRFID is giving everyone the opportunity to educate themselves about RFID free. An educated consumer is a confident consumer!

In the courses you learn the differences between LF, HF, UHF and Microwave RFID Technologies. What the different components of an RFID tag/transponder are. What are the different types of Tags. What are the benefits and limitations of each frequency? What is EPCglobal; what is EPC Gen 2 and are they applicable to your business? You educate yourself on these basics and more at your computer.

To obtain the courses all you need to do is go to SkyRFID.com and select the Free RFID Course option from the menu choices.
