Press release from: [American Air & Water®, Inc.](#)

Hilton Head Island, SC, August, 2007 - American Air & Water®, Inc awarded exclusive distribution of UV disinfection systems to Australasian Air & Water, Ltd in an agreement signed by the two companies. The Australasian Air & Water Distributorship will cover all of Australia, New Zealand and the South Pacific Islands.

American Air & Water®, Inc, a South Carolina Corporation, offers a complete line of UV air, surface and water disinfection systems which greatly reduce or eliminate microbiological contamination of air or water for industrial, commercial and residential establishments. In addition, American Air & Water®, Inc. will support Australasian Air & Water, Ltd with proprietary knowledge, engineering and formulas for the UV systems as well as proprietary marketing materials, including video, web sites, catalogues, brochures and training information.

Australasian Air & Water will use its business expertise to promote the acquisition, resale, distribution and installation of UV air and water disinfection systems in Australia, New Zealand and the South Pacific Islands, aiming to become a premier source of ultraviolet air and water purification products and solutions there.

Kerry Grimshaw, CEO of Australasian Air & Water with a background in Building and Project Management, states: "This is an opportunity to introduce quality UV disinfection systems in this part of the world at a time of a National Housing Leaky Buildings crisis. These products have a great future in our territory because of our climatic conditions and I am very confident of a real success with well planned management. We will be able to provide an effective solution to the problems we've had in our hospitals with viral and bacterial infections, as well as a solution to indoor mold and mold related problems common in our territory. I believe this will be a very successful business arrangement."

Warren Lynn, President of American Air & Water®, Inc. said "We are pleased to have secured our relationship with an organization seeking to represent and promote our products and solutions in Australia, New Zealand and the South Pacific Islands. As we are pursuing our vision of providing a healthier and safer tomorrow, we are happy to establish our presence in this part of the world as well. To better accommodate the needs of our growing base of international customers we are implementing an international distribution strategy with local representatives to cover each respective territory. Australasian Air & Water joined our international distribution only three months after the addition of Canadian Air & Water to our network".

For additional information on the exclusive Australasian distributorship contact Warren Lynn or visit American Air & Water®, Inc. website: www.americanairandwater.com

American Air & Water®, Inc. is dedicated to developing and delivering solutions for reducing human exposure to environmental pollutants as well as controlling the spread of harmful microorganisms inside homes, offices, hospitals, farms - most any indoor environment.

American Air & Water[®], Inc. carries products and offer solutions for improving air and water quality and increasing comfort and productivity by creating a healthier indoor environment. Our thorough protocols identify the source of pollution and contamination and prescribe steps for remediation of the problems and measures for protecting the building from recurring contamination. Once the environmental control techniques are implemented and a building is recognized and certified as healthy, it is our guarantee that it will offer a safer, healthier, more comfortable and more productive environment.
