Integrated Solution Leverages RFID Smart Label Design and Print Capabilities

GREAT FALLS, VA - epcSolutions is excited to announce a partnership agreement with Niceware to include the NiceLabel bar code or RFID smart label design and print software into RFIDTagManager™.

RFIDTagManager is the most installed RFID compliance software for the current 600 Wal*Mart suppliers. RFIDTagManager has the capability to be set-up and print Wal*Mart, DoD or Best Buy compliant labels in under one hour as a standalone solution, or can be fully integrated with many back-end systems. RFIDTagManager 3.5 has added full DoD compliance support including Wide Area Workflow (WAWF), Advance Ship Notice (ASN) and UID. Wal*Mart compliance support now includes the capability for Data Synchronization (GDSN) and Advance Ship Notice (ASN). RFIDTagManager 3.5 also includes an API for advance integration with back-end systems.

“The integration of NiceLabel with RFIDTagManager provides our customers with a complete printing solution.” States Kevin Kail, CEO epcSolutions. “We are very happy to have been able to team up with Niceware and look forward to a great relationship.”

Supporting the RFID functionality of the NiceLabel Pro edition in epcSolutions’ RFIDTagManager enables end users to leverage the industry’s leading RFID smart label design and printing software and benefit from already existing or new NiceLabel deployments. End users are empowered by the integrated ease-of-use of RFIDTagManager with the friendly design interface and the powerful RFID print engine of the NiceLabel software.

“We see our partnership with epcSolutions as another confirmation of the value NiceLabel brings to any barcode or RFID application,” says Carl Cressman, Director of Sales at Niceware International. “NiceLabel is sold through value added resellers, system integrators and software publishers and epcSolutions is one of the best.”

NiceLabel® is a family of professional labeling software products that provide a complete bar code printing and RFID smart labeling solution to desktop, mobile and enterprise users. NiceLabel supports over 25 different languages and over 1300 true Windows thermal transfer printer drivers (NiceDrivers). Simple, wizard-driven user interface, rich integration options and a unique data-entry application provide the quickest and most productive label design and printing solution available.
