

MEDICO prepares for Honduras in September with new look from LogoBee

Date: 08-23-2007 04:11 PM CET

Category: [Health & Medicine](#)

Press release from: [LogoBee, Inc.](#)

From September 8-15 a newly formed team of volunteers will be traveling to Nicaragua in order to help the local population. They will offer their skills to these impoverished people in order to improve their quality of life. Honduras is amongst the top three poorest countries within our hemisphere; so there is a great need for this aide.

MEDICO is short for Medical, Eye and Dental International Care Organization; they are a non-profit organization that provides these important services to the people of Honduras and Nicaragua. If not for MEDICO these inhabitants may never receive this type of care. These services are provided by teams of both professional and lay persons that volunteer their time for a minimum of one week.

Since they are a non-profit organization, MEDICO is funded through donations and the fees that are associated with their travel teams. That is why they were pleased to be chosen as one of the winners of LogoBee's annual logo design Makeover Project. A new public image was provided free of charge. The graphic design team was happy to make this donation to an organization who gives so much.
