

Suva chooses Picturepark™ as Media Asset Management Solution

Date: 08-28-2007 03:58 PM CET

Category: [IT, New Media & Software](#)

Press release from: [Vision-IT](#)

Swiss Accident Insurance Fund (Suva) decided in favour of Picturepark in the early summer 2007. As Image Finder didn't ensure system support in Switzerland anymore, a new solution had to be procured. Using Picturepark, employees can access the latest images and documents via Intranet. In a second step the system could be opened for external users too. This is easily possible thanks to the differentiated authorisation management of Picturepark.

Furthermore, Picturepark offers the possibility to directly publish documents on Suva's website through its web-publishing function.

As the most important carrier of obligatory accident insurance, Swiss Accident Insurance Fund (Suva) insures over 1,8 million employees against occupational and non-occupational accidents as well as against work-related illnesses.

Suva is another well-known customer of Swiss solution provider Vision-IT. Picturepark is used by leading companies such as Siemens, Swatch, Rieter, Siegfried and Swisslog.
