

TOPEX welcomes you at South America Exhibitions 1-12 October 2007

Date: 09-05-2007 09:37 PM CET

Category: [Media & Telecommunications](#)

Press release from: [TOPEX](#)

TOPEX intentions to expand its business in the South American market determine the company to participate in the main events in Latin America between October 1st and 12th

Being permanently preoccupied to grow its international market presence, TOPEX will participate in the major Telecom and IT exhibitions from Latin America - Futurecom Brazil October 1st-4th held in Florianopolis and Expocom Argentina October 9th-12th – La Rural, Predio Ferial de Buenos Aires, booth M-28.

Both events gather the most distinguished executives and professionals from the Telecom and IT sectors, international operators, suppliers of products and services, as well as corporate customers. The main interest of those exhibitors will be the presentation of technological solutions and innovations such as wireless or fixed telephony, Internet, VoIP and Wireless Technologies.

“We are pleased to announce that TOPEX will be exhibiting at the upcoming Expocom Argentina 2007 and would like to take this opportunity to meet industry professionals interested to know about our solutions. Everyone is of course welcome to come and see us.” said Dan Hodos, Regional Sales Director for CALA region.

TOPEX will propose its pivot directions for 2007 – NGN Solution and Bytton Router. TOPEX NGN Solution is perfect for applications such as voice upgrade for ISP, cable companies, wholesale and voice termination. It is based on TOPEX SoftSwitch, featuring Class 4 and Class 5 services, and the range of media Gateways.

TOPEX HSDPA Wireless Broadband Router is an All-In-One device that serves, at the same time, as a terminal simultaneous voice calls and Internet access, as a WIFI Access Point, as a VPN Router with powerful Firewall, LAN Server and Video Surveillance Server.

Bytton wireless router incorporates innovative features such as the DUAL SIM technology which permits the unit to automatically switch networks in the event of one network failure, IPSec VPN, L2TP, PPTP tunnels over the internet with complete security.

The router acts as a voice cost optimizer tool for fixed to mobile calls with Least Cost Routing capability.
