Press release from: [ADC Nordic](#)

Toyota Tsusho ID Systems GmbH, the official trading partner for DENSO handheld terminals and scanners in Europe, are strengthening their activities in Scandinavia and using ADC Nordic AB as an authorised distribution partner.

ADC Nordic AB, one of the most important distributors of mobile data capture equipment in Scandinavia, are expanding their range with immediate effect to include DENSO handheld terminals and scanners. ADC Nordic AB provides dealers, system integrators and IT consultants with hardware, software solutions, repair services and marketing support. With offices in Sweden, Norway, Finland and Denmark, the company has a presence in the whole Nordic region.

"The co-operation with Toyota Tsusho ID Systems allows us to offer our clients high-quality DENSO products", says Mikael Svensson, Managing Director at ADC Nordic with great enthusiasm. "In this way we can expand our portfolio not only quantitatively but also especially in terms of quality." The Japanese company is also more than satisfied with the new co-operation. "We have great ambitions in Scandinavia", says Udo Neukirchen, Head of Distribution EMEA at Toyota Tsusho ID Systems GmbH. "The potential in Scandinavia is considerable and with ADC Nordic we have found a partner who has the necessary strength and at the same time meets our expectations regarding quality and service."
